

# WHAT ARE ALLERGY DROPS?

Allergy drops are the new, pain-free way to treat environmental and pet allergies.

The same custom formulas used in allergy shots are now available in convenient, pain-free drops. Taken at home daily, each sweet-tasting drop placed under the tongue is packed with your child's own personal blend of allergens designed to gradually desensitize their immune system.

- Same proven, FDA-approved\* allergen blend used in allergy shots
- Easy, at-home drops under the tongue
- Lasting environmental allergy relief
- Great for pet allergies
- Results seen in just weeks

*\*Allergy drops use the same FDA-approved allergic extracts given in allergy shots (oral administration pending FDA approval).*

**Clarity Allergy Center treats the full range of adult and pediatric allergy, asthma, and immunology needs.**

Asthma, and Immunology

# ADULTS & KIDS LOVE ALLERGY DROPS

Dr. Brian Rotskoff's allergy drops program is fun for kids and easy for moms and dads.

- No more needles
- No weekly trips to the doctor
- Safe for young children
- Ask about our fun allergy drops program with kid-friendly chart-trackers and prizes

## Why Choose Allergy Drops?

Allergy drops are proven to help children and adults overcome chronic nasal allergies and hay fever.

- Pain-free and sweet-tasting
- Convenient, at-home dosing
- Preliminary results in just 2-6 weeks
- Reduces need for oral allergy medication
- Successfully treats broader range of allergies and may prevent new allergies
- Alters immune response to allergens for permanent allergy "cure"
- Improves asthma control and may prevent asthma from developing

# DR. ROTSKOFF'S DROPS PROGRAM

Starting an allergy drops regimen at Clarity Allergy Center is easy. Patients are on their way to better breathing in just two appointments.

## Allergy drops success in five easy steps:

1. In-office allergy skin testing to identify personal allergen triggers
2. Customized allergy drops prescription blended in office
3. Under-the-tongue drops taken at home each day
4. Tolerance builds as immune system becomes desensitized
5. Ultimate "cure" of allergy symptoms in 3-5 years

## Allergy Drops vs. Allergy Shots

While allergy drops and allergy shots are both effective in treating environmental allergies, allergy drops offer many benefits that make them the perfect choice for kids and busy parents.

	ALLERGY SHOTS	ALLERGY DROPS
Begins with allergy testing	✓	✓
FDA-approved allergen formulas	✓	✓
Allergy "cure" in 3-5 years	✓	✓
Targets all allergens at once	✓	✓
Full concentration at start for immediate improvement		✓
Pain-free administration		✓
Convenient, self-use at home		✓
Doctor visits only 1-2x/year		✓
Safe and easy for kids as young as 4-5 years		✓
